

Dodeca SavingsTime (DST) Customer Case Studies

LexisNexis commissioned a study by PWC that found they spent approximately 27,000 work hours per year producing management reports. Dodeca allows them to spend less time creating reports and more time analyzing the information on the reports. One application resulted in savings of an estimated 280 work days per quarter.

LexisNexis
DST since 2018

Wells Fargo continues to find new use cases, constantly increasing their ROI. They have built numerous mission-critical Dodeca applications including monthly variance analysis and quarterly governmental stress test reporting resulting in savings in excess of \$10,000,000.

DST since 1999

The Kroger Company has standardized on Dodeca for many mission-critical, spreadsheet-based applications that complement their Oracle Cloud Financials implementation. Dodeca saves Kroger time and money at both the corporate level and at the store level. They have an application that saves 1,500 work hours per day in store reporting. Kroger's conservative total savings estimate exceeds \$500 Million to date.

DST since 2001

Four Seasons Hotels and Resorts maintained hundreds of manually-prepared spreadsheets to track unique contractual terms for each of its 120+ luxury properties. Dodeca automated the manual process saving significant time while ensuring calculation consistency and enabled the introduction of weekly forecasting to help guide the company through the pandemic.
